

Carnival project have three domains- Digital, Fleet, and Shore. Digital is mainly agile development and have projects like Brand Web, Mycruise, SSO, onboard portal etc. Digital projects are now going through a tech refresh where UI is changing MFA architecture meanwhile AEM which is Content management system for carnival is moving to cloud. Both the application will be integrated through SSO platform.

Fleet and shore projects are mainly based on waterfall model. Fleet projects are xdine, YMS, iCafe, POS. Shore project are TAA, Mistral etc.
